Full Forms

- UTP → Unshielded Twisted Pair.

- STP → Shielded Twisted Pair.

- GEO → Geo-Stationary Orbit.

- MEO → Medium-Earth Orbit.

- LEO → Low-Earth Orbit.

- NIC → Network Interface Card.

- PAN → (Personal Area Network)
  or (Permanent Account Number)

- LAN → Local Area Network.

- MAN → Metropolitan Area Network.

- WAN → Wide Area Network.

- DNS → Domain Name Server.

- WAIS → Wide Area Information Server.

- ISP → Internet Service Provider.

- NSF → National Science Foundation.

- OC → Optical Carrier.

- SONET → Synchronous Optical Network Technology

- IEEE → Institute of Electrical & Electronics Engineers.

- FDDI → Fiber Distributed Data Interface.

- VSNL → Videsh Sanchar Nigam Limited.

- ISDN → Integrated Services Digital Network.

- PPP → Point-to-Point Protocol.

- DSL → Digital Subscriber Line.

- ADSL → Asymmetric Digital Subscriber Line.

- SDSL → Symmetric Digital Subscriber Line.

- HFC → Hybrid Fiber Coax.

- RFOG → Radio Frequency Over Glass.

- VSAT → Very Small Aperture Terminal.

- E-Mail → Electronic Mail.

- FTP → File Transfer Protocol.

- HTTP → Hyper-Text Transfer Protocol.

- SMTP → Simple Mail Transfer Protocol.

- IMAP → Internet Message Access Protocol.

- NNTP → Network News Transfer Protocol.

- POP → (Post Office Protocol) or (Procedure Oriented Programming)

- ATM → Automatic Teller Machine.

- SMS → Short Message Service.

- MMS → Multimedia Message Service.

- CDMA → Code Division Multiple Access.

- TDMA → Time Division Multiple Access.

- WLL → Wireless Local Loop.

- FDMA → ~~Site~~ <ins>Frequency</ins> Division Multiple Access.

- UMTS → Universal Mobile Telecommunication System.

- SSL → Secure Socket Layer.
  //→ It's used for authenticat by using login or password.

- wwww (W4) → Wireless World Wide Web.

- MAC → Media Access Control.

- URL → Uniform Resource Locator.

- VOIP → Voice-Over Internet Protocol.

- IRC → Internet Relay Chatting.

- AMPS → Advanced Mobile Phone Service.

- GSM → Global System for Mobile.

- IMT → International Mobile Telecommunication.

- P2P → Peer-to-Peer
- W3C → World Wide Web Consortium
- WiMAX → Worldwide Interoperability for Microwave Access.
- WLAN → Wireless Local Area Network.
- GPRS → General Packet Radio Service.
- DBS → Data Base System.
- ODBC → Open DataBase Connectivity.
- JDBC → Java DataBase Connectivity.
- HTML → Hyper Text Markup Language.
- XML → Extensible Markup Language.
- RDBMS → Relational DataBase Management System.
- SQL → Structured Query Language.
- DDL → Data Definition Language.

- DML → Data Manipulation Language.

- DCL → Data Control Language.

- TCL → Transaction Control Language.

- www (w3) → World Wide Web.

- EDI → Electronic Data Interchange.

- OLTP → OnLine Transaction Processing.

- OLAP → OnLine Analytical Processing.

- EFT → Electronic Fund Transfer.

- UPI → Unified Payment Interface.

- AEPS → Aadhar Enabled Payment Service.

- POS → Point Of Sale ~~terminal~~.

- ECS → Electronic Clearing System.

- RTGS → Real-Time Gross Settlement.

- NEFT → National Electronic Fund Transfer.

- IMPS → IMmediate Payment Service.

- CLI → Command line Interface.

- GUI → Graphical User Interface.

- IDE → Integrated Development Environment.

- KYC → Know Your Customer.

- OTP → One-Time Password.

- UPS → Uninterrupted Power Supply.
